

iMet-4 Radiosonde

InterMet's newest radiosonde for synoptic and research use

Details

Downloads & Support

- Simple to use, with no pre-flight calibration required
- Small size and weight (120 gm)
- Capacitive humidity sensor includes heater to minimize icing, and ultra-thin membrane for fast response in upper altitudes
- Air temperature sensor includes hydrophobic coating to minimize wet-bulb effects
- Calibrated pressure sensor included as standard equipment
- High-performance U-blox Cam 8 GPS receiver
- Narrow band (6 kHz) transmission for maximum range and performance
- Seven pre-programmed frequencies with custom options available
